

Your customers have a choice. Now, so do you.

Superior voice messaging by CHOICEVOICE can help you keep customers and win new ones.

Always on call:
Harry Graff & Lisa Koven

24/7

reliable & customized voice messaging

Operator error is one thing. But, problems with telephone answering systems are by no means limited to human error. Power outages. Answering machine or office voicemail system failure. Forgetting to forward your calls to your service at the end of the day. If something can go wrong, it will, and at the worst possible time. **CHOICEVOICE** is the answer. Because our equipment is maintained on our premises, there's no installation or equipment to buy. What's more, our power back-up system and equipment redundancy ensure that you're provided with unparalleled service at all times. The bottom line? You sleep better at night knowing that your business is in good hands.

A system you control, rather than one that controls you.

CHOICEVOICE is anything but another cookie cutter voice messaging system. Our proprietary technology was designed to give you extraordinary control and versatility over how, when and where you receive messages. With **CHOICEVOICE**, callers can send their messages via normal or urgent delivery. Each voice mailbox can be notified immediately when a message is received, or receive all messages at one specified time of day – forwarded to the phone, beeper or cellular phone of your choice. You'll know the exact date and time the message was received. And because the message is in the caller's voice, there's no misinterpretation of information. In short, you'll receive all of your messages promptly and accurately – every time.

Before choosing any voice messaging system, get a second opinion.

If anyone knows the importance of receiving timely and accurate messages, it's the medical community. Perhaps this is why **CHOICEVOICE** has quickly become the number one choice among many of South Florida's most prominent physicians. From Cardiologists to Oncologists, no other voice messaging system satisfies the dependability, flexibility and accuracy that doctors demand. Need a second opinion? We'll be happy to provide you with the names of doctors who consider **CHOICEVOICE** to be an important part of their medical practice.

Unparalleled customer service at a superior price.

Because **CHOICEVOICE** is independently owned and operated, we're able to provide our clients with superior customer service at a highly competitive price (as much as 70% less than live answering services). **CHOICEVOICE** offers complete training and support – whether you have one voice mailbox or one hundred. What's more, we're here 24 hours a day, seven days a week to assist you. Need immediate customized changes to your service? No problem. Want to add fax capabilities or change where you receive your messages? Just call. You won't find this kind of dedication with any other voice messaging service. We guarantee it.
